Empathy & Teamwork: Skilled in considering diverse perspectives and fostering a collaborative work environment.

Self-management & Organizational Skills: Successfully managed studies and work independently, prioritizing tasks and adhering to schedules effectively.

Problem-solving: Proficient in independently researching and identifying solutions to complex problems.

- React, TypeScript
- ASP.NET Core, Swagger, FastAPI
- Woocommerce, Elementor
- Technical SEO and Accessibility
- Figma (Design)

Maria Emilia
Päivärinta

I am a 29-year-old third-year engineering student specializing in software development. I am currently based in Malta but plan to relocate to Finland at the beginning of the year to continue my studies and career development.

My primary interest lies in full-stack development, as its various aspects provide continuous challenges and opportunities to learn. Alongside my studies, I have worked as a technical project coordinator, gaining valuable hands-on experience in project management, client interaction, and technical implementation.
